

TrakMotive® Introduces New Replacement Intermediate Shafts

As a recognized leader in CV axles, Trakmotive is pleased to announce the release of **2 New Intermediate Shafts** to complement our Axle program. These units are currently in stock and ready to ship.

The TrakMotive Advantage:

- Direct replacement for OE intermediate shaft
- Precision rolled splines
- Heat-Treated and precision machined solid steel shaft
- High-Strength spring steel retaining clips included (Where required)
- Decreases the risk of return warranty claims due to installer error
- Time saving installation

Dodge Durango

Chrysler Aspen

Mitsubishi Raider

Dodge Ram 1500

New Intermediate Shaft Numbers Are in Stock and Ready to Ship:

TrakMotive No.	Make	Model	Years	Location
CH-3504	Dodge	Dakota, Durango	2000-2001	Front Driver & Passenger
CH-3505	Chrysler, Dodge, Mitsubishi	Aspen, Dakota, Durango, Raider, Ram 1500	2001-2011	Front Passenger

TrakMotive recommends replacing these Intermediate Shafts whenever a corresponding CV Axle is replaced.

Note: The Dodge stub shaft in 4 wheel drive truck applications wears due to the high torque load. Additionally, the circlips are only recommended for a single installation. Therefore we recommend replacing the intermediate/stub shaft in these applications to ensure a more precise spline fitment and a positive lock into the axle and differential.

Contact your local TrakMotive Sales Representative or our Customer Service Department for more details.
