

# HD Xtreme™

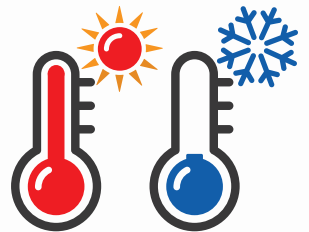

## Constant Velocity Drive Axle

DESIGNED FOR EXTREME ENVIRONMENTAL CONDITIONS

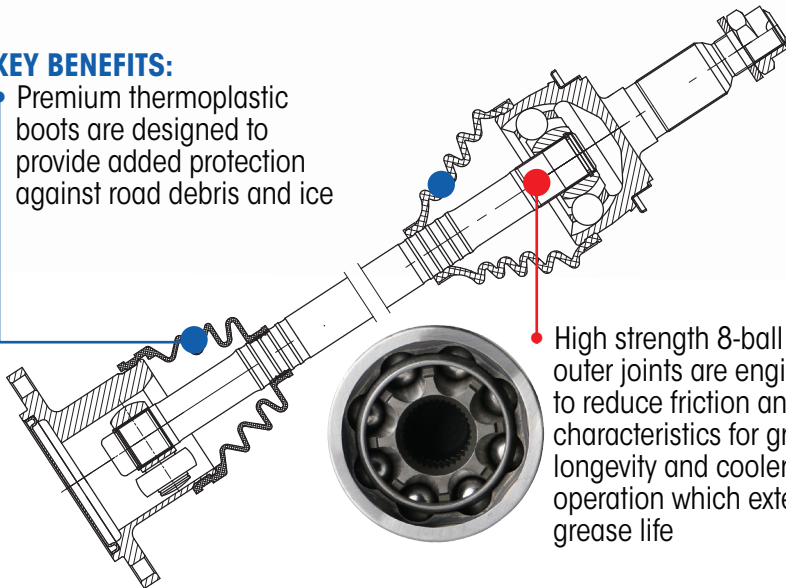

# TrakMotive®

Extreme weather and rugged conditions can be tough on today's vehicles. This is especially true with work vehicles that are required to operate in even the worst environmental conditions. OE style CV axles function well in normal conditions but can be subject to premature failure due to extreme cold, heat and rugged conditions. TrakMotive offers a solution with the New HD Xtreme CV Axle program, which is specifically designed to handle the most extreme environments.

### KEY BENEFITS:

- Premium thermoplastic boots are designed to provide added protection against road debris and ice

High strength 8-ball fixed outer joints are engineered to reduce friction and wear characteristics for greater longevity and cooler operation which extends grease life

### FEATURES:

- Premium thermoplastic boots withstand exposure to extreme temperatures ranging from  $-58^{\circ}\text{F}/50^{\circ}\text{C}$  to  $+478^{\circ}\text{F}/248^{\circ}\text{C}$ .
- Stainless steel stepless clamps provide improved clamping force on the TPE boot to create a tighter, more reliable  $360^{\circ}$  optimum seal even in the most extreme temperatures.
- Specially formulated 7023B grease is designed to resist loss of lubricity and maintain OE lubricant performance in even the most severe temperatures ranging from  $-40^{\circ}\text{F}/\text{C}$  to  $+280^{\circ}\text{F}/140^{\circ}\text{C}$ .

**Long Lasting Performance in Even the Most Extreme Conditions**  
Ideal for fleet applications and ride sharing / delivery vehicles like Uber, Lyft, Grubhub, DoorDash & more.
