

Expanded New Drive Shaft Assembly Program

TrakMotive continues its commitment in providing leading market coverage to help maximize your sales opportunities. This includes our "All New" Complete Drive Shaft Assembly program that was recently expanded to **431 skus**, covering 4,000 + year-make-model applications and well over 50 million-part opportunities. (VIO Data)

Fix the Cause - Not the Symptom

For today's professional technician, it is often the best practice to replace the entire drive shaft assembly versus just replacing individual components, which typically only address the symptom and not the root cause.

Premium forged u-joints provide maintenance free life and can handle higher torque loads

Premium durable coating protects shaft from premature corrosion

Thermoplastic elastomer (TPE) dust boots provide better resistance to deformation, debris, oils, heat cycling and ozone compared to neoprene boots

Stainless steel band clamps provide better resistance to deformation and stretching

All units are 100% machine balanced to ensure trouble free service life from vibration and noise

U-Joint cups are packed with premium lithium grease providing better lubrication and resistance to extreme temperatures

Special low friction sliding joint spline coating extends service life and eliminates movement that causes clunking noises
