Long Lasting Performance in Even the Most Extreme Conditions.

Extreme weather and rugged conditions can be tough on today's vehicles. This is especially true with work vehicles that are required to operate in even the worst environmental conditions. OE style CV axles function well in normal conditions but can be subject to premature failure due to extreme cold, heat and rugged conditions. TrakMotive offers a solution with the HD Xtreme CV Axle program, which is specifically designed to handle the most extreme environments.

Key Benefits:

1. 8-Ball Fixed Outer Joints*

Benefit: Reduces friction and wear characteristics for greater longevity and cooler operation which extends grease life.

2. Premium Thermoplastic Boots

Benefit: Withstands exposure to extreme temperatures ranging from -58°F/50°C to +478°F/ 248°C and are designed for added protection against road debris and ice.

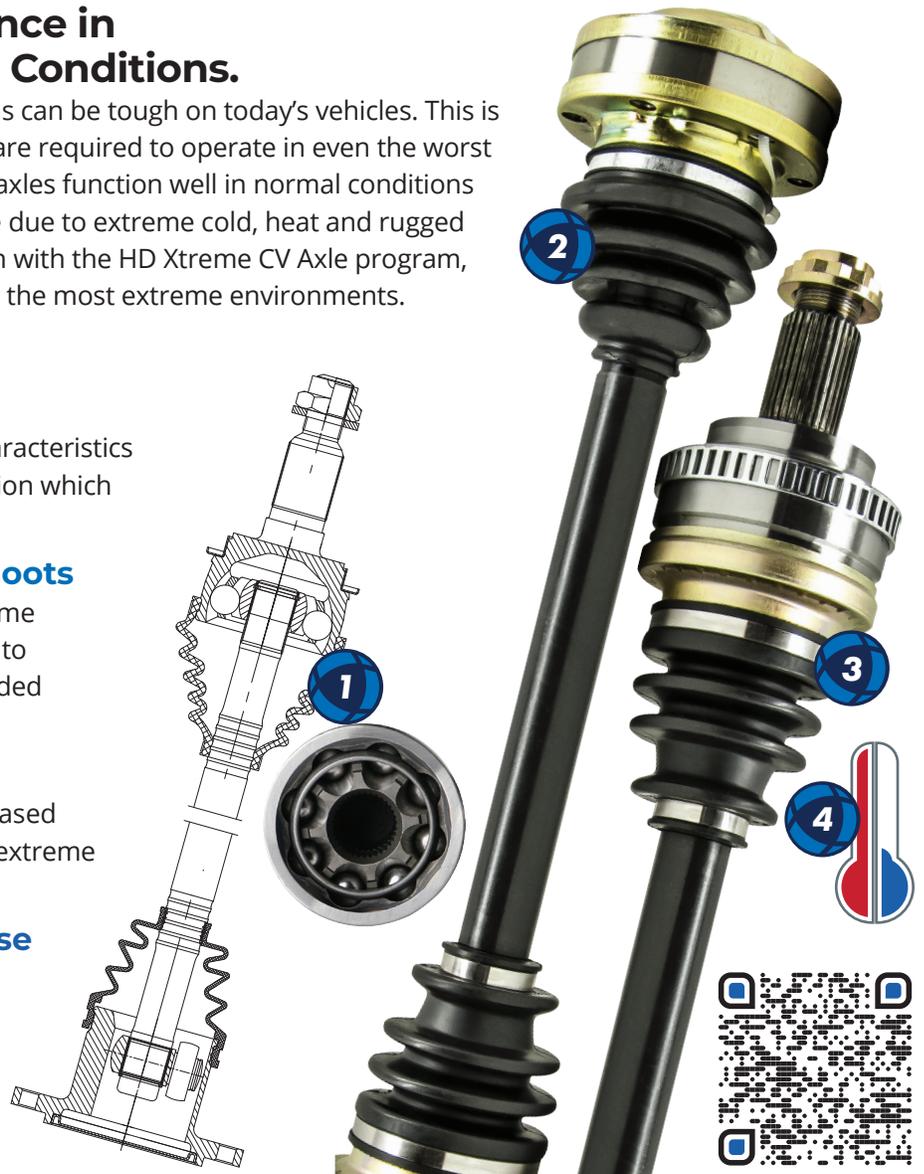

3. Stainless Steel Clamps

Benefit: For added strength and increased corrosion resistance even in the most extreme temperatures.

4. Severe Temperature Grease

Benefit: Resists loss of lubricity and maintain OE lubricant performance in even the most severe temperatures ranging from -40°F/C to +280°F/140°C.

*Where Applicable

Ideal for fleet applications and ride sharing / delivery vehicles like Uber, Lyft, Grubhub, DoorDash & more.
