

Winter is Just Around the Corner – Get Ready with TrakMotive® HD Xtreme™ CV Axles

FOLLOW US ON SOCIAL MEDIA

When the temperature drops and the roads get rough, standard OE-style CV axles can suffer from premature failure - especially on work vehicles operating in extreme conditions.

TrakMotive's HD Xtreme™ CV Axle Program is engineered to perform where others fail, making it the perfect solution for fleets, rideshare, and delivery vehicles that must stay on the road no matter the weather.

Key Benefits:

1. 8-Ball Fixed Outer Joints*

Benefit: Reduces friction for smoother operation.

2. Premium Thermoplastic Boots

Benefit: Withstands extreme hot and cold temperatures.

3. Stainless Steel Clamps

Benefit: Provides maximum strength and corrosion resistance.

4. Severe Temperature Grease

Benefit: Maintains lubricity in the harshest environments.

Don't let winter conditions sideline your work vehicle. Choose HD Xtreme™ CV Axles for superior durability and peace of mind through every season.
