Buy from the Originator. Not the Imitator.

Why settle for a copy when you can buy from the source that designed, tested, and perfected the Xtended Travel™ CV axle? As the aftermarket originator, we deliver OE-level fit, performance, and durability – purpose-built for lifted vehicle applications.

Innovation Driven by Experience

We don't just follow trends – we set them. With complete control over our R&D process, we're able to release new applications faster and respond to market demands without third-party delays. Our commitment to innovation and specialization in CV axle technology has made us the trusted choice for professional installers across North America.

Key Benefits:

1. Sliding Spline Center Shaft

Benefit: Provides up to a full 40mm greater linear travel than OE, which allows for greater suspension travel for off-road and lifted applications.

2. 8-Ball Fixed CV Inner & Outer Joints*

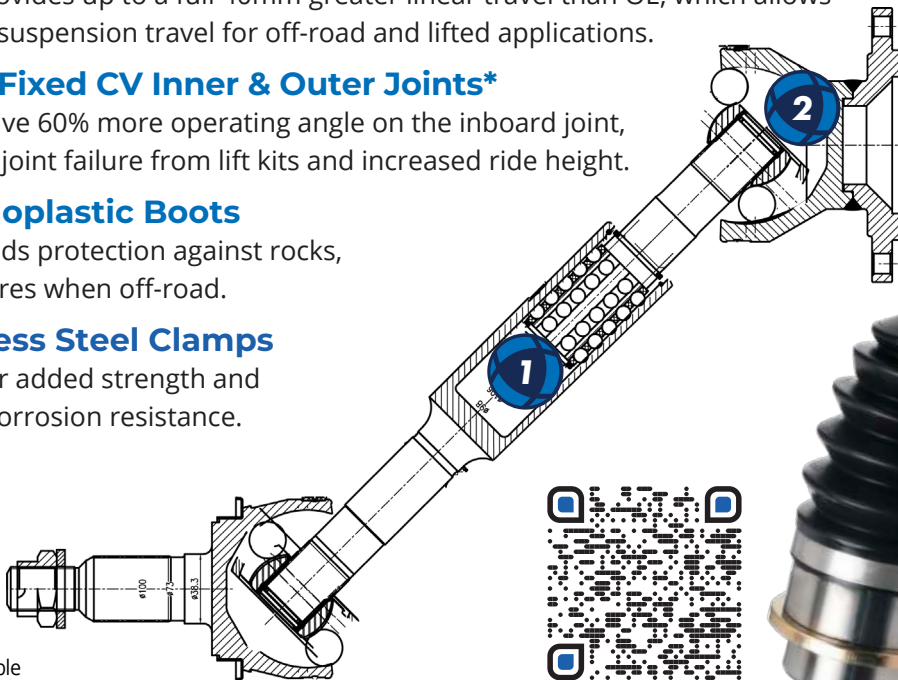

Benefit: Have 60% more operating angle on the inboard joint, eliminating joint failure from lift kits and increased ride height.

3. Thermoplastic Boots

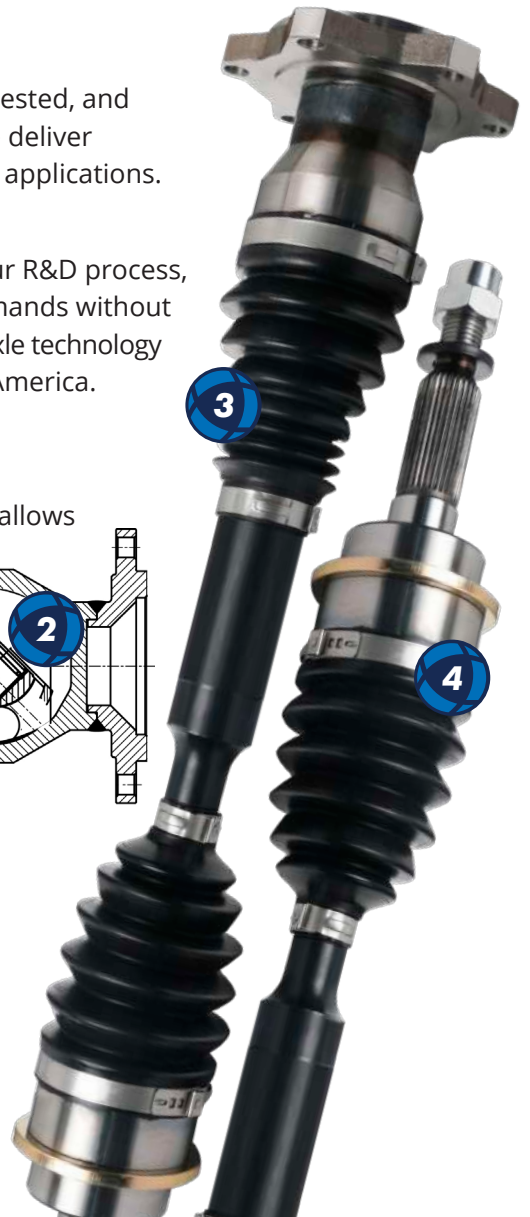

Benefit: Adds protection against rocks, and punctures when off-road.

4. Stainless Steel Clamps

Benefit: For added strength and increased corrosion resistance.

*Where Applicable

Upgrade confidently. TrakMotive® Xtended Travel™ CV Axles are ready to handle whatever the road – or trail – throws your way.
