NOV 3-5 | LAS VEGAS

More Brands. More Parts. More Coverage.

Stop in to See How We're "Building What Moves You"

AAPEX 2026 is almost here, and TrakMotive is arriving with more than ever. For years, professionals have trusted TrakMotive for premium driveline solutions, including CV axles, intermediate shafts, drive shaft assemblies and window regulators.

Now we're bringing that same quality and dependability to new categories, giving distributors, technicians and repair shops one source for even more of the parts they need.

Leading that growth are two brands joining the TrakMotive family. **Suspensia®** adds one of the industry's most comprehensive steering and suspension programs, covering control arms, ball joints, tie rod ends, stabilizer links, wheel bearings and hubs across domestic, import and light truck applications. **Tuff Support®** brings lift supports, power lift supports, and dampers for hoods, liftgates, trunks, tailgates and hatches, engineered for OE-quality fit and long-lasting performance.

Come discover something new at Booth F13617, meet our team, and see the full lineup up close. Can't wait until November? Explore our expanding brand family now at trakmotive.com/brands.
